

CLBCOM 120

MAY - JUNE, 2003

Squire SS-100 Registry

MAY MEETING IN CARLISLE, PA

It is common for newsletter editors to state, "If you missed our annual get together you missed some wonderful weather". Arthur R. Stahl is here to tell you he's not going to say that!

I had flown to New Jersey the prior weekend to spend a week working on Tony Coppola's Chassis # 26. Living in Arizona for many years lulls you into a false sense of weather security but at the last minute, having some extra room in my luggage, I threw in an old sweat shirt and shop jacket and after arrival, I NEVER TOOK THE DARN THINGS OFF! It was cold, foggy and windy most of the week and by the Carlisle weekend, raining, cold and windy.

To show you what a tough breed Squire owners are, we had five Squires there and members from California, Arizona, New Mexico, Michigan, New York, North Carolina and Maryland. And to top it off, Paul and Jan Dullaert drove their Squire SS-100 down from Canada. Despite the lousy weather we enjoyed the company and meeting some owners for the first time. The one big disappointment was the fact that the ground was so wet and muddy we could not get down and really inspect the many modifications and improvements that had been made to the cars present.

We held a general meeting and one of the things discussed was a desire to return to two get togethers a year, one in the west in the spring and hopefully, one in the east in the fall. The west is not a problem, we have lots of locations and volunteers. The east, where most of the Squires live, needs a volunteer location and/or someone to put it together. Anyone up for that? Member Paul Helmick has furnished us with two views of some very chilly members and thoroughly soaked Squires.

NEW INTERMECCANICA BADGES AND CLOTH PATCHES

mentioned in the last newsletter were also discussed at the Carlisle meeting and on the spot we put together enough orders to secure the patches. If those of you that did not attend want patches, NOW is the time to let me know. We also took orders for 16 of the revised Intermeccanica grill badges and need orders for four more of them at \$35 each to get the required minimum amount of twenty so lets hear from you on that subject please!

A NEW UPDATED ROSTER IS ATTACHED

and if any of your data is incorrect please let me know. The next newsletter will contain a much needed updated addition to the Parts & Repair Manual put together by Paul Dullaert.
